Zjednoczenie Wodno-Inzynieryjne Budownictwa Przemyslowego (Krakow Union of Hydraulic Engineering for Industrial Construction), which has offices on Grzegorzki Street (until July 1953 at 3 Zbozowa Street)

25X1

25X1

25X1

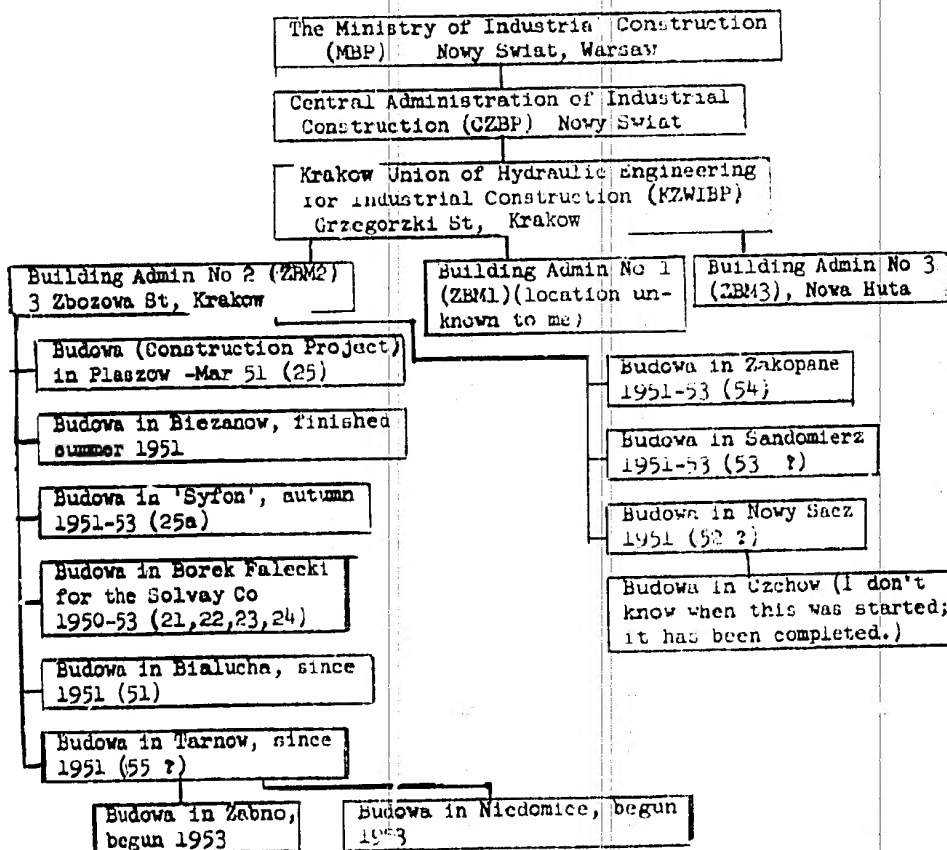

the Union or KZWI. When it was organized the Union assumed certain hydraulic responsibilities of Panstwowego Przedsiębiorstwa Robot Komunikacyjnych (PPRK - National Enterprise for Communications Works). The PPRK now handles only communications projects.

3. "The KZWI is dependent in turn on Centralny Zarzad Budownictwa Przemyslowego (Central Administration of Industrial Construction - CZBP), located on Nowy Swiat in Warsaw. The CZBP falls under the Polish Ministerstwo Budownictwa Przemyslowego (Ministry of Industrial Construction - MBP).

4. "KZWI has several Building Administrations. [redacted] ZMB2 at 3 Zbozowa Street, Building Administration No 1 (ZMB1) located somewhere outside Krakow, and Building Administration No 3 (ZMB3) located at Nowa Huta.

25X1

5. "The following chart illustrates this administrative hierarchy and lists the ZMB2 construction projects [redacted]

Legend

(a) In the above chart Budowa means construction.

(b) The figures in parentheses after the names of the construction projects are the figures used by ZMB2 to designate these projects; [redacted] questionmarks by the numbers [redacted] not certain. In practice these numbers are preceded by BW (budowa wodna - Hydraulic construction), eg BW54 is the hydraulic construction project at Zakopane. The construction project at Bieczano has no symbol because it was finished

25X1

25X1

CONFIDENTIAL

25X1

25X1

CONFIDENTIAL

25X1

-3-

before the numerical system was adopted. [redacted]

25X1

25X1

- (c) In 1951 ZMB2 was enlarged and put in charge of construction projects at Zakopane, Sandomierz, Nowy Sacz, Tarnow and Dialucha. These projects had been started earlier. [redacted]

25X1

25X1

[redacted] About 30 employees were added at that time.

- (d) The construction project at Czchow consisted in maintenance work on a dam. It carried no numerical symbol. Administratively it was part of the Nowy Sacz project.

25X1

25X1

25X1

- (e) The construction at Miedowice and Zabno was scheduled to begin during 1953. The Katowice Union of Wodno-Inzynieryjne Budownictwa Przemyslowego was also involved. [redacted]

[redacted] these two particular projects were considered very important and came under the jurisdiction of the Tarnow construction project.

Construction Projects

6. "ZMB2 was first put in charge of construction projects at Biezanow and Czchow. Then as one project was completed, others were taken over or begun. ZMB2 does no agricultural construction work. Its projects are industrial, involving hydraulic engineering: canal construction, pipe systems, dams, etc.

25X1 7.

25X1

25X1

"Budowa Plaszow: [redacted] This is a canal or irrigation system located in the direction of Plaszow-Rybitwa. [redacted] a ditch about eight meters wide, filled with water. That ditch was the first phase of construction. In spring 1951 wooden poles were being driven into the bottom of the ditch by electrical machinery. In autumn 1952 only the embankment was visible. Some sort of machinery known as 'Larsens' (?), imported from Czechoslovakia, was needed for this project and was impossible to import during summer 1952. The Plaszow 'collector' (kolektor) was linked with that of Syfon at the beginning of 1953. [redacted] ignorance of technical terms. The manager was Ing Wladyslaw Terajewicz until summer 1952, then /fnu/ Dull.

25X1

8. "Budowa Syfon: Started autumn 1951. It is a continuation of the Plaszow project. It runs under the bed of the Vistula River. [redacted]

25X1

25X1

25X1

[redacted] The Syfon construction was completed in the winter of 1953. Friends of mine received awards at the completion of the project. The manager was Ing /fnu/ Homanski.

9. "To reach Syfon from Krakow one takes Tram No 7 toward Grzegorzec. That tram runs as far as the factory formerly called Mieleniewskiego. Then one walks across railway tracks leading to Nowa Huta, in the opposite direction to the Grzegorzec railway station, which is located on the Vistula near the municipal slaughter house. The distance from the last stop is between three and 3-1/2 km. One can shorten the trip by going through the closed area of a military unit, but that is forbidden. [redacted]

25X1

25X1

10. "Budowa Borek Falecki: [redacted] It is located about two km from the Solvay factory area. To reach the office one walks through the factory premises. Solvay maintains several reservoirs for chemical waste products formed during the production of soda. In 1951 the foreman, /fnu/ Wojcik showed me one of these reservoirs and told me that there was no use for the thick white waste liquid. [redacted] in spring 1952 some of this Solvay waste leaked into the Vistula and poisoned a great number of fish. Many people talked of the dead fish floating on the water. The manager is Ing Kazimierz Rostalski.

25X1

25X1

CONFIDENTIAL

25X1

CONFIDENTIAL

25X1

- 25X1 11. "Budowa Bialucha: This is a project to regulate the Bialucha River. [redacted]
 25X1 [redacted] from the ZMB2 personnel department that there
 25X1 had been damage to a reservoir or dam due to negligence. Heavy rains had
 25X1 also caused floods. The manager is /fnu/ Celuch.
 25X1 12. "Budowa Zakopane: This was for the regulation of mountain streams. ZMB2
 25X1 took it over in 1951 and finished it in 1953. The manager was Tadeusz (1)
 Brodkiewicz.
 13. "Budowa Dandolierz: ZMB2 took this over in 1951 and finished it in 1953.
 25X1 [redacted] it was a dam or canal project for river regulation.
 14. "Budowa Nowy Sacz: River regulation. Conservation work on the Czchów
 dam is part of this project. The manager is Ing /fnu/ Nowakowski.
 15. "Budowa Tarnow: [redacted]
 25X1 the ZMB2 Social Referent in directing a 'potato action'.
 25X1 The Niedomice project involves work for a large factory at Niedomice. It
 25X1 was started in the winter of 1952 and taken over by ZMB2 at the beginning of
 January 1953. [redacted] The Zabno project
 also comes under direction from Tarnow. The manager is Ing Jan Jaglo.

Personnel

16. "ZMB2 employs about 200 white collar workers and 1000 - 1100 laborers. The
 numbers, especially of laborers, vary from month to month. The white collar
 workers include about 70 women. There are about 90 technical workers (22 -
 25 engineers, 40 technicians, 20-22 foremen) and about 110 administrative
 and clerical workers, including 30 bookkeepers. The laborers include
 about 110 women. There are about 300 skilled laborers and 700 unskilled
 laborers. [redacted]

17. "In autumn 1952 the distribution of workers at particular construction
 projects was as follows:

<u>Project</u>	<u>Laborers</u>	<u>White Collar Workers</u>
Plaszow (BW 25)	400	40
Syfon (BW 25a)	250	30
Borek Falecki (BW 21,22,23,24)	100	15
Bialucha (BW 51)	40	5
Tarnow (BW 55)	180	15
Nowy Sacz (BW 52)	60	10
Zakopane (BW 54)	50	6
Sandomierz (BW 53)	30	4
Magnatyn /not mentioned before/	5	1
ZMB2 offices (Zarząd ZMB2)	10	70

25X1

1,125

196

18. [redacted] about 4% of the employees of ZMB2 are Party members.
 In the Krakow region, i.e. the construction projects at Biezanow, Plaszow,
 Syfon, Borek Falecki and Bialucha - there were in 1952 about 30-33 ZMB2
 members of the CP.

19. "Three people actually run ZMB2:

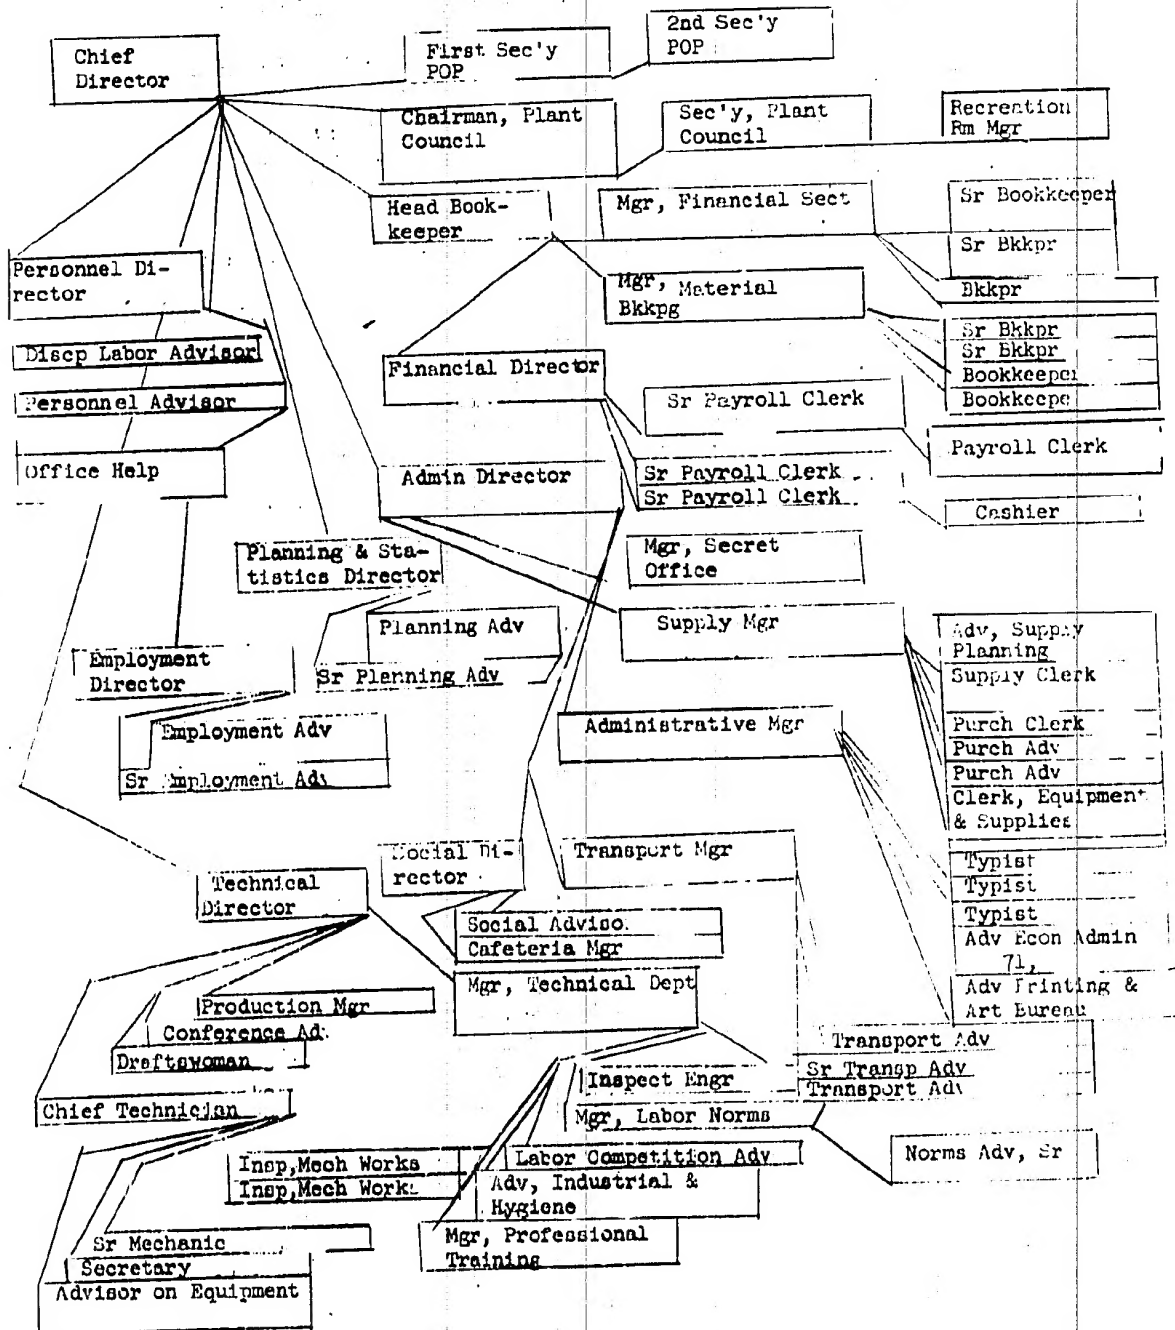

Eng Marian Szancer - Chief Director (until autumn 1953)
 Eng Czesław Lipinski - Technical Director
 Dr. Marian Czuma - Administrative Director

Prior to the reorganization of ZMB2 in March 1951 the Chief Director had been
 Ing Władysław Scieranski. Directly under the Chief Director come the
 Director of Planning, the Director of Employment, the Head Bookkeeper, the
 Personnel Director, the Chairman of the Plant Council and the First
 Secretary of the POP (the Basic CP organization in ZMB2).

25X1

25X1 21. "Following [redacted] persons [redacted] were
25X1 connected with the KZWI and ZMB2 during 1951-53.

22. KZWI Personnel

25X1 Ing Roman Okuszek, Chief Director of KZWI. Engineer by profession [redacted]
25X1 [redacted]
25X1 [redacted]

/fnu/ Balbinski or Babinski. His signature appeared on papers from the Ministry of Industrial Construction.

Ing /fnu/ Kurhanowicz, Chief Director of the Central Administration of Industrial Construction in Warsaw. Engineer by profession. He was one of the former co-owners of the engineers' cooperative, Hydrotrest, which was nationalized. A friend of Marian Szancer, Chief Director of ZMB2.

Mgr /fnu/ Krzakowski, Administrative Director of KZWI. Probably a lawyer by profession, a 'bachelor of law.'

25X1 /fnu/ Chrzanowski, a manager (?) at KZWI. [redacted]
25X1 [redacted]

/fnu/ Szlachta, engineer (?). Member of KZWI. Energetic.

25X1 /fnu/ Wasko, Director of Social and Living Matters (*socjalnych mieszkaniowych*)
25X1 at KZWI. Probably a Party member. [redacted]

25X1 /fnu/ Szlachta, former Personnel Director of KZWI. Former laborer. He has
25X1 a position in the CP administration. He worked in KZWI until June 1952 as
25X1 Personnel Director, then was transferred to the Krakow organization of the
25X1 PZPR (Polish CP). [redacted]

/fnu/ Czubernat (sp ?). Female. A personnel advisor in KZWI, the right arm of the Personnel Director. She is the virtual director; she runs everything and uses her own judgment in handling matters as she knows more about personnel work than the Personnel Director. [redacted]

25X1 [redacted] She is a member of the Polish CP. Very
25X1 clever and intelligent, has a good memory and great social ease. Though she
25X1 is a Party member, she 'gabs' a lot about the Party. She has no particular
25X1 enemies.
25X1 judge that [redacted]
25X1 [redacted]

25X1 /fnu/ Orlowska. A clerk who takes care of the KZWI personnel files and pre-
25X1 [redacted]
25X1 [redacted]

25X1 Irena Arabuska, former Labor Discipline Advisor at KZWI. In 1953 she was
25X1 [redacted]
25X1 [redacted]

25X1 The Personnel Director of KZWI for a few months starting in June 1952 was
25X1 later replaced by /fnu/ Czubernat. This man gave an impression of intelli-
25X1 gence, but he was sick, probably TB. [redacted]

25X1

25X1 project) as an inspector engineer.

25X1

25X1

Ing Jerzy Rozwadowski, Manager of the professional training section of ZBM2, hydraulic engineer by profession.

25X1

25X1

Ing Jan Kierasinski.

25X1

Zenon Tarkowski worked from 1950 to spring 1951 when he was transferred to a communications concern. He was a technical advisor and chairman of the Plant Council.

25X1

25X1

Jerzy Sliwinski, ZBM2 Advisor on labor competition and work norms since autumn 1952. From autumn 1951 to autumn 1952 he was employed as an advisor on labor discipline at the construction project at Borek Faiecki. A member of the ZMP, but since the ZMP was almost nonexistent in our area - he was not active.

25X1

25X1

25X1

Krystyna Wdowiak, a draftsman, advisor on technical and production matters, employed from 1950 to 1953.

25X1

25X1

Stanislawa Juszkiewicz - Conference Advisor. She handled all the affairs of the Head Engineer and Technical Director, Czeslaw Lipinski. A trained secretary by profession and very familiar with technical and production matters.

25X1

25X1

25X1

Janusz Jankowski. he started in December 1952. He was previously employed on the construction at Plasow as director of hydraulic and earth works. Professional hydraulic technician.

25X1

25X1

25X1

Wladyslaw Kloe, Manager of the Production Section of ZBM2. Hydraulic
